Lens Colour	Clear

RECOMMENDED APPLICATIONS

- Light and Precision Engineering
- Assembly and Maintenance
- Turning and Milling
- Forestry and Agriculture
- Laboratory
- Offshoring/Maritime
- Oil and Gas
- Plant Visitors

CARE INSTRUCTIONS

Clean lens with running water and mild soap (pH neutral soap, pH of 6 to 8) with no waxes or fat (waxes, oils, and grease will deposit a film which could interfere with anti-fog properties). Rinse lens with clean water, shake off excess water, and let air dry.
Caution: Avoid soaking or excessively rubbing coated lens during the cleaning process.
