

# Anti Slip Tape For Outdoor/Indoor Use

## General Info

1. Grit silicon particles are embedded in a high strength, crosslinking, and climate resistant vinyl film.
2. It has excellent wear resistance, heavy duty with thicker extra-coarse surface and aggressive adhesive, which ensures it can be excellently adhered to different surfaces.
3. Widely used at different areas and locations for safety, such as stairs, floors, decks, corridor, elevators, warehouse, garage, stadium, subway, equipment and many more.
4. Available in white, black, clear, red, yellow, green, orange, blue, glow in dark and other colors as well as yellow/black or other double color,
5. Different width such as 5, 10, 15 cm by 18 meter length per roll.

## Technical data

6. Surface Film: Vinyl film at 0.15mm thickness
7. Composition: Vinyl film + grit silicon + backing glue + backing paper
8. Glue Type: water resistant self adhesive acrylic glue (pressure sensitive glue)
9. Storage: Should be stored in a cool and dry area, preferably at 18~28°C and 30~50% relative humidity.

## Commercial Grade Reflective Tape

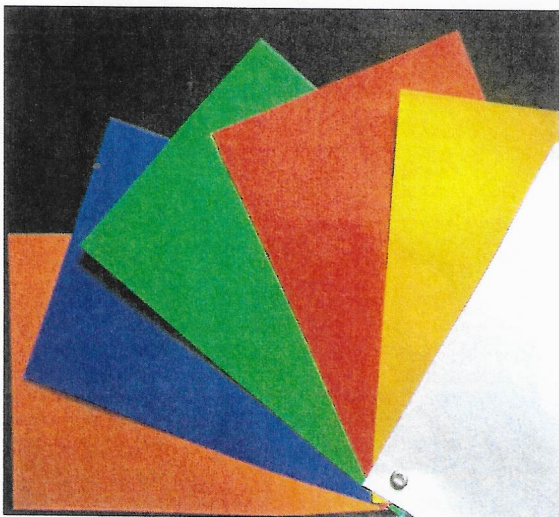

This is a cost efficient Reflective Sign Sheeting or Reflective Tape . It is unprintable Commercial Grade Reflective Sheeting (but we can print with double color stripes in house as shown below). If you need the same grade cheap reflective sign vinyl to be printable by screen or **HP latex printers**, please switch to check our high quality H3200.

**Comparison of Our Reflective Tape vs Counterparts of Other Suppliers**

First of all, cost efficient reflective sign sheeting or tape does not imply compromised quality here. Rather, ours are guaranteed with better quality that will not let you down. We are proud that many of our reflective products are in same or similar quality to **3M** or **Avery** reflective sheeting.

In contrast, our reflective tape has a **higher retro-reflection** (reflectivity) than its counterparts as we tested and compared with most competitors in China. Even more, its overall working performance has **outperformed** those from other reflective sign sheeting manufacturers and suppliers too. We have not got any complaint on this product ever.

Also we use the better quality solvent based glue for longer durability while most others use water based ones.

Please see below our reflective sheets **retro-reflection tests** in white and yellow colors by the famous testing machine Roadvista from US. In comparison, for example, the reflectivity of white color commercial grade reflective film from other brands in China are only ranging from a small 4-5 cd/lux to mostly 30 cd/lux.

## Main Difference among Our Different Commercial Grade Reflective Vinyl

- We recommend this cost efficient retro reflective tape sheeting for price sensitive clients. It works great for short term road signs and also many of our clients use it as cost efficient cheap reflective tape. But please note it is unprintable, can not tear off and looks a bit glossy. In fact, being non tearable is actually **easier** for applying the reflective sign vinyl film by hands and handy if you want to peel it off right after application (in case you applied it in wrong way and want to redo it).
- If you need screen printing (or **HP latex printing**) or need the vinyl to be flexible (such as road signs or reflective collars for plastic traffic cones or posts) or longer durability, you can check out: comercial grade reflective sheeting H3200 and compare. H3200 is acrylic type, screen printable, can tear off (like paper) with proven **higher retro-reflection** than most competitors.
- For other multiple printing requirements such as eco-solvent printing reflective materials, check out the unique digital printable reflective vinyl sheeting H3300 (proven better digital printing performance than most other counterparts).

Below picture is the packing of the reflective cargo.

## More info

### Specifications:

- About 3 years outdoor durability
- Pressure sensitive adhesive, with backing paper
- Glass bead construction
- Can not tear off/rip
- Can not print (except with PET ink)
- Easy operation

### Suggested Applications:

- Advertisement signs
- Work zone signs and other similar signs of short period
- Vehicle marking for decoration purpose (such as cars) or reflective stickers

### Size:

- 5cm/10cm/0.61m/1.22m x 45.7m
- 24 " x 50 yard
- 48 " x 50 yard
- Other size available upon request

### Colors:

white, red, yellow, blue, green, orange, black

So, if your needs are clear and mainly look for retro reflective sheet or reflective vinyl film at cheap prices, then this product will be the one you should check out first. We do have clients who once switched from **Oralite Economy Grade 5200** and Commercial grade reflective vinyl film 5300 to our H3200. On the other hand, this reflective tape is enough to replace others if your signs requirements are more focused at short term use at lower costs.

If you need it to last longer (5-7 years traffic signs), please check our our high quality Engineering Grade Reflective Sheeting. They are the **same quality as 3M (but you pay much less)**.

Certainly, you can start **saving money now** by contacting us with your specific needs and estimated volume. We will reply (within 24 hours) with our good offers.
